

Job Specification

For: Technical Reviewer - Civil Engineering

Ref: VR/01316

Job Description

Chatham, Kent
From £29 per hour

Technical Reviewers in Civil / Structural Engineering required for construction training facility based in Chatham, Kent. Hybrid / Remote working options. Work will be on a zero-hour contract, adhoc basis, a few hours per week (this varies dependent on projects).

The company is a leading provider of innovative teaching, learning, assessment, and training design for businesses, the defence sector, and individual learners. As the sister company of an FE College and with a strong partnership with the Royal School of Military Engineering (RSME), the company brings extensive experience and expertise to deliver high-quality training. With deep subject specialism in construction, engineering, and professional skills, the organisation offers a dynamic blend of industrial, academic, and military experience to provide bespoke training design and delivery.

Role Description

As a Technical Reviewer in Civil / Structural Engineering you will be responsible for reviewing and ensuring the accuracy and quality of technical training materials. Your day-to-day tasks will include reviewing training content, providing feedback and suggestions for improvement, and collaborating with the training design team. This is a hybrid role, based in Chatham with the flexibility to work remotely.

Experience that will assist you in the role

- Strong knowledge and experience in technical training and subject matter expertise
- Change from British to Eurocodes
- Attention to detail and ability to review and analyse training materials
- Excellent written and verbal communication skills
- Proficiency in using digital tools and platforms for reviewing and providing feedback
- Ability to work independently and meet deadlines
- Experience in the education or training industry

Subject Matter Expertise is required in the following areas:

- Construction risk management
- Surveying and topographical data
- Geotechnical analysis
- Civil Engineering design process
- Materials and properties: timber, concrete, steel, masonry, brickwork
- Structural analysis and assessment; actions and load paths, verifying structures
- Composite elements and structures in temporary works
- Demolition and disposal

The company is committed to creating a diverse and inclusive workplace. All applications will be considered. They provide support through Mental Health First Aid and Coaching and Mentoring
